** EARTHQUAKE EMERGENCY **

Radio Amateurs in Turkey remain active in the response to the earth-
quake that struck Van province on 23 October. Assistance has been
given by TRAC in setting up VHF/UHF networks to relief agencies and
some traffic is being carried on the 144 MHz band. The need for HF
operations is reducing, however there is still a overnment station
which may operate on 7.092 MHz USB. Amateurs are still requested
to be careful when operating between 7.092 and 7.095 MHz to avoid
interference to ongoing relief operations.
